ABOUT THIS SEMINAR

Every day a growing number of organizations are attracted by the promise of Open Source software: low cost full featured solutions that will help drive down the total cost of ownership of an IT infrastructure. Software like Linux, OpenOffice, MySQL and Firefox are considered mainstream solutions nowadays and are being widely adopted. But how about solutions for Business Intelligence: are BI Suites like Pentaho or Jaspersoft already mature enough to compete with the established proprietary vendors? Can MySQL be used as an analytical or a data warehouse database and if not, which alternatives are available? This two day seminar not only gives you a complete overview of the Open Source BI market, but also shows how mature the various parts of the BI stack are and how they can best be applied in a new or existing BI infrastructure. What makes this seminar really unique is the large amount of live demo's and case studies to help you getting started right away.

LEARNING OBJECTIVES

- A comprehensive overview of what Open Source BI is and whether it is a feasible alternative for your own BI challenges
- How to select the right tools to build, expand or replace a BI stack
- How the leading Open Source BI suites compare to the leading closed source alternatives like Business Objects, Cognos, Microsoft and Oracle
- Where and how to start implementing OS BI solutions

| | | |
|---|--|---|
| <p>1. Open Source Primer</p> <ul style="list-style-type: none"> • The Open Source promise • Definitions & licenses • Development model • Myths, facts and fables • Linux versus Windows <p>2. Open Source BI Overview</p> <ul style="list-style-type: none"> • Business Intelligence introduction • The 'BI Stack': components & maturity levels • OS BI Suites: JasperSoft, Pentaho and SpagoBI <p>3. Data Warehousing</p> <ul style="list-style-type: none"> • Data Integration: physical versus virtual • Overview ETL market • Talend and Kettle: Enterprise ready yet ? • Open Source databases for Data Warehousing & analytics • Data Modelling and Management, Meta- and Master Data Management • Alternative ETL solutions (LucidDB & ImpPalo) • Business Rules & Realtime BI • Open source based Cloud and SaaS Data Warehouse offerings • Cases & demo's <p>4. BI Suites in depth</p> <ul style="list-style-type: none"> • SpagoBI, JasperSoft and Pentaho (incl. demos) • Reporting tools compared • Eclipse as BI development platform? • The all-in-one Ingres Icebreaker solution | <ul style="list-style-type: none"> • Open Source BI compared to MISOS (Microsoft, IBM, SAP, Oracle and SAS) • Mix & Match: using Open Source in a closed source architecture <p>5. Enterprise Performance Management and Analytics</p> <ul style="list-style-type: none"> • Open Source EPM solutions? • OLAP, Data mining and statistics • Planning and budgeting • OpenOffice as BI tool ? • Portals & Dashboards <p>6. Implementing Open Source BI</p> <ul style="list-style-type: none"> • The case for OS BI: When and where to apply Open Source solutions • Open BI methodologies: Mike 2.0 & Agile Data Warehousing • Managing risk: OS BI implementation do's and don't's • BI is never free: how to calculate the TCO for OS BI? • How about implementation partners, support, tailoring and required skills? • Getting started: where to begin and how to proceed? <p>7. Summary and conclusions</p> <ul style="list-style-type: none"> • Analyst perspectives • The future of Open Source BI | <p>WHOU SHOULD ATTEND</p> <p>Both IT and Business people who want to obtain better insight in the feasibility of using Open Source BI software as part of a corporate infrastructure.</p> <ul style="list-style-type: none"> • BI Professionals and Consultants • IT and BI (Project) Managers • IT Architects • DBA's responsible for maintaining BI and DWH solutions • IT oriented Business Analysts |

SPEAKER

Jos Van Dongen is one of Europe's leading analysts, authors and speakers on Open Source BI developments. Mr. van Dongen has been involved in software development, Business Intelligence and Data Warehousing since 1991. Over the past years he has successfully implemented Business Intelligence solutions for a large variety of organisations, both profit and non-profit. He regularly covers new developments in BI and Data Warehousing for the Dutch Database Magazine. All articles covering open source BI have been recently revised and published in a book titled 'Low cost, high value?'. He is also the co-author of the first book on developing Open Source BI solutions with Pentaho, published by Wiley in August 2009.
